TRAVEL BACK IN TIME

EMBARK ON A JOURNEY BACK IN TIME

In honor of the 75th Anniversary of D-Day, the National Museum of the U.S. Air Force™ will open a new, highly interactive, augmented reality experience, “D-Day: Freedom from Above” focusing on the 82nd and 101st Airborne divisions and their missions during D-Day. The exhibit will open Monday, May 13, 2019, in the Museum’s second building.

A HIGHLY INTERACTIVE EXPERIENCE

This limited-time exhibit utilizes tablets running the innovative technology “HistoPad,” designed by the French company Histoverly. HistoPad is an interactive technology which will immerse you in the history of Sainte-Mère-Église, Normandy France, during the Occupation and the summer of 1944. Through spectacular historically-validated 360° recreations, in association with the Airborne Museum of Sainte-Mère-Église, you will travel in time to understand the key moments of this decisive battle for the success of D-Day.

The 3,500 square foot exhibit will feature twelve physical panels that will guide you through the experience. HistoPad technology will allow you to manipulate a series of 3D virtual relics, view period photographs and extracts of archival films, interact with animated maps, and learn the incredible destinies of some of our nation’s D-Day heroes.

DISCOVER HISTORY IN YOUR HANDS

ENHANCING D-DAY EXPERIENCE

This highly interactive D-Day exhibit will allow you to experience the Museum's D-Day displays in an entirely new way. Within the exhibit, you will learn about the paratrooper experience. For example, the act of equipping a virtual paratrooper with gear gives the real equipment on display additional meaning.

Presented in 7 different languages, HistoPad technology makes learning fun by presenting information in a manner tech-savvy youth have come to expect. You will interact with the history, men and equipment of D-Day, and will be drawn deeper into this pivotal day in history.

EASY AND FUN

The HistoPad technology is easy to use with clear icons prompting you to explore and engage with the content.

IMMERSIVE EXPERIENCE

By orienting the screen in every direction, you can explore a reconstructed site from 1944.

SHOWCASING COLLECTIONS

Concise texts, interactive objects, sounds effects and animations enable you to learn more about period artifacts.

RELIC HUNT

Activities help stimulate curiosity and encourage deeper interaction.

RICH MEDIA

Exceptional archival films and interactive animated maps enhance the experience further.
